

For Immediate Release

NewParadigms Press announces the availability of the The Leadership Paradigms

Put aside what you think you know about how to develop the skills of a leader!

The twenty first century promises to be a time of uncertainty, chaos, change and opportunity. In that boiling mix, some companies, individuals, and families will survive and prosper while others will not. Why? What learnable skills separate those who prosper from those who do not? If success-as-leader is critical for you, and your organization, this book is for you. *The Leadership Paradigms* defines the core skills required to get ahead and stay ahead in today's fractured and chaotic marketplace.

Before you spend money and time on motivational programs, CDs, whoopla, off-sites, and "visioneering," read this book.

[Dr. Jim Dillahunty](#) introduces five new paradigms that define the transformational skill sets of leadership. Without these paradigms-as-guidance systems, your leadership development efforts will consistently lead you on a wrong, expensive pathway.

Dr. Jim Dillahunty calls upon his academic research, front-line experiences as a CEO and successful entrepreneur (founder of Advisors Asset Management; www.AAM.US.Com); to present his case of what's wrong with most leadership programs. The result is a well-researched and clearly written book that takes the reader from analysis and discussion to the specific tasks needed to get leadership done right. The concepts presented are keen insights, and most importantly, they work across geographic and cultural divides—for individuals, organizations, and families. Publication date; January 2010.
